

# ECO Primer AL-101M

This water-based Eco primer is formulated with nano-structured technology, offering superior synergistic anti-corrosive performance. It is the ideal solution to rust problem on metal and adhesion on stainless steel and aluminum metal substrates.

## APPLICATIONS

exterior and interior metal substrates of stainless steel, aluminum, steel, galvanized steel, iron, and copper. For building and constructions.

### UNIQUE FEATURES

- Excellent salt spray resistance
- Single pack and fast dry
- Excellent water resistance
- Outstanding adhesion
- Excellent weathering resistance
- Economic
- Low VOC
- Non-toxic Lead free

Before salt spray test

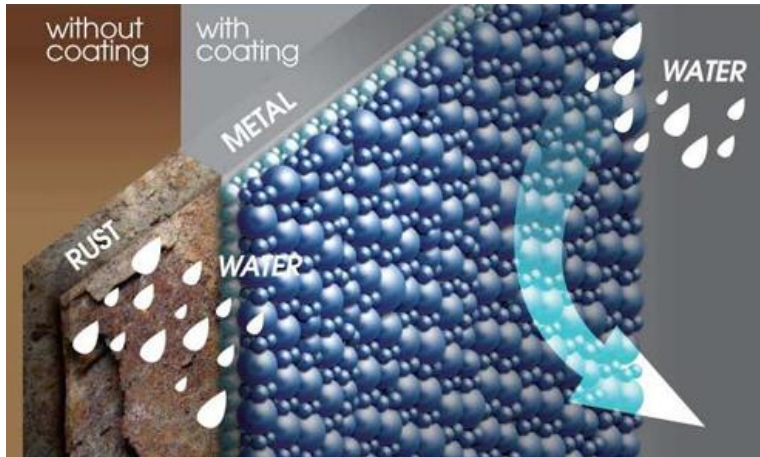

After 168hr salt spray test

## INNOVATION

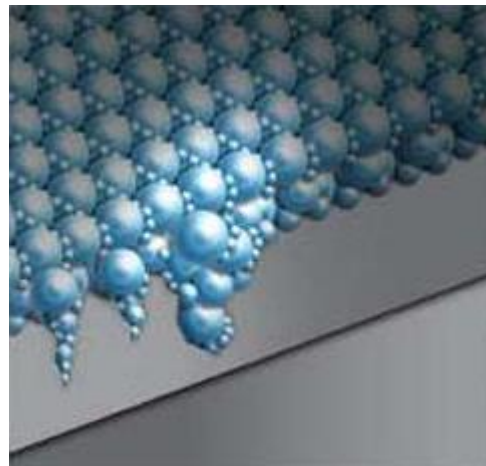

## TECHNOLOGY

The molecules of this nano-structure coating bond so tightly that blocks all water from penetrating the surface of the substrate. Metals will stay strong and last longer.

## CRYSTALIZATION

Gaps and cracks can be filled to form a smooth surface. Paint molecules penetrate and make the substrate stronger than ever.
